Applied Microeconomics, International Trade, Development Economics

Education

University of Auckland — **Auckland, New Zealand**
Ph.D. in Economics — *January 2023 - present*
Visiting student, University of Melbourne — *July 2025 - January 2026*

Tongji University — **Shanghai, China**
Master of Economics — *September 2019 - March 2022*

China Jiliang University — **Hangzhou, China**
Bachelor of Engineering — *September 2015 - June 2019*

Job Market Paper

Trade-induced Credit Shocks and the Size of Productive Firms

- Abstract: Import competition can affect domestic firms beyond directly exposed industries by weakening banks' lending capacity and tightening credit supply. I study whether such spillovers through the banking sector limit the expansion of productive firms. Using data from India between 1998 and 2007, I construct an industry-level measure of trade-induced credit shocks. I find that these shocks reduce sales more for high-productivity firms, with particularly pronounced effects among small and young firms. The findings highlight the importance of accounting for the financial transmission of import shocks and the potential vulnerability of productive firms to credit supply disruptions.
